

HEADMAPPING SERVICE DEFINITIONS

1/3 Panel -
Creates a color accent only around the fringe area and is great on short hair.

1/2 Panel -
Creates color accents that add a bit more color to the front top of the head. Ideal for short hair.

1/3 Panel Division A -
Creates color accents around the whole face and the front part

of the top of the head. Great for medium length textured hair that cascades towards the face.

Full Panel Division A -
Creates color accents around the face, sides, front and back

part of the head. The most popular service for maintaining highlights. The service is great for medium to long hair.

Full Panel Division AC -
Creates color accents in the front and back top of the head,

sides and nape area. Ideal partial highlight service for long hair that is put up in a high ponytail or hairclip.

Full Panel Division ABC -
Creates color accents all over the head. Ideal for the fine hair that

needs body, also great for short layered styles.

Full Panel Division AB -
Creates color accents over all the head, except for the

nape area. This service is great on long layered hair and helps cover difficult cowlicks in back of head.

Full Panel -
Creates color accents that add even more color to the front and back top of the

head. Covers the top of the head and is ideal for short and one length hair.
